PROFESSIONAL SUMMARY

Front-End Developer focused on building intuitive and reactive digital experiences. Skilled in transforming complex concepts into user-friendly interfaces, with experience across the full development lifecycle, from legacy systems (AngularJS) to modern applications using React, Ionic, Next.js, and TypeScript. Currently developing a full-stack personal finance application with an Ionic/React front-end and a serverless Firebase back-end. Eager to leverage strong problem-solving and analytical skills, gained through a planned career transition and ongoing postgraduate studies in Software Engineering, to collaborate with dynamic teams in building high-impact products.

WORK EXPERIENCE

Front-end Intern | Selsyn Tecnologia February 2025 - August 2025

- Developed and maintained web and mobile applications.
- Fixed bugs and implemented essential business features in legacy systems using AngularJS.
- Developed back-end integrations for the creation of complex reports.
- Performed manual and usability testing on React and Ionic products to ensure quality and an intuitive, error-free user experience.

Freelance Developer | Tech Zoow May 2025 - June 2025

- Successfully developed and launched a complete, fully responsive website.

- Created a modern and functional platform that enhanced the company's digital presence, streamlined client communication, and increased online engagement.

Freelance Developer | Hospital Veterinário Vital August 2025 - September 2025

- Built a single-page application (SPA) for a 24/7 veterinary hospital using Next.js and Tailwind CSS.
- Focused on a modern, responsive design and a user experience (UX) optimized for emergency situations, featuring quick access to contacts and locations.
- Implemented interactive components, including an image carousel, video modals, and a dynamic header that reacts to user scrolling.

EDUCATION

Postgraduate Degree in Software Engineering PUC Minas (Ongoing)

Certificate Program, Front-End Development EBAC - British School of Creative Arts and Technology

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, HTML5, CSS3
- **Frameworks & Libraries:** React, Next.js, Ionic, AngularJS, Tailwind CSS
- **Tools & Technologies:** Git, Firebase, Software Development, Agile Methodologies, Responsive Design
- **Concepts:** Artificial Intelligence, UX/UI, Usability Testing, Problem-Solving

ADDITIONAL COURSES

- Artificial Intelligence
- Transform Your Business with Artificial Intelligence
- IT from Zero to Pro
